

S&G INNOVA S.A.S

Services Portfolio

1. Specialized and Custom Software Development

Our company specializes in the creation of customized software solutions, tailored to the specific needs of your business. From web applications to integrated systems, we design, develop and implement technological solutions that optimize processes and improve operational efficiency. We have a team of experts in the most advanced technologies, ensuring that each project is aligned with your strategic objectives.

Services included:

- ◆ Development of enterprise platforms.
- ◆ Integration with existing systems.
- ◆ Web and desktop applications.
- ◆ Solutions based on artificial intelligence and process automation.

2. Technology Consulting

Our consulting services are designed to help you identify opportunities for improvement, optimize your technology infrastructure and apply best practices for your industry. We make sure to provide you with strategic advice that maximizes the return on investment (ROI) of your technology investments and enables your company to stay ahead in the digital era.

Services included:

- ◆ Evaluation of technological infrastructure.
- ◆ Digital transformation consulting.
- ◆ Optimization of technological processes.
- ◆ Security and compliance strategies.

3. Blockchain Project Development

Explore the potential of blockchain technology to transform your business. We offer custom blockchain solution development, helping companies implement distributed log technologies (DLT) that improve transparency, security and traceability of processes.

Services included:

- ◆ Development of smart contracts.
- ◆ Creation of decentralized management platforms.
- ◆ Implementation of DeFi solutions.
- ◆ Consulting on blockchain integration in existing systems.

4. VR/AR Interactive Experiences

Transform the way your customers interact with your brand through immersive Virtual Reality (VR) and Augmented Reality (AR) experiences. We offer interactive solutions that improve user engagement, allowing you to stand out in a highly competitive market. From realistic simulations to customized virtual experiences, we help you take your business to the next level.

Services included:

- ◆ VR/AR application development.
- ◆ Training and training simulations.
- ◆ Immersive marketing experiences.
- ◆ Retail and entertainment applications.

5. Mobile Development

We develop robust and scalable mobile apps for iOS and Android, tailored to the demands of today's users. Whether you need an enterprise application, an e-commerce solution or an entertainment app, our team ensures that the user experience is intuitive and functional, maximizing the reach of your product.

Services included:

- ◆ Development of native applications for iOS and Android.
- ◆ Multiplatform hybrid applications.
- ◆ Design focused on user experience (UX/UI).
- ◆ Integration with backend services and APIs.
